Fund Summary

Investment Objective

Vanguard Total International Stock Index Fund (the “Fund”) seeks to track the performance of a benchmark index that measures the investment return of stocks issued by companies located in developed and emerging markets, excluding the United States.

Fees and Expenses

The following tables describe the fees and expenses you may pay if you buy, hold, and sell Admiral Shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and example below.**

Shareholder Fees

(Fees paid directly from your investment)

Sales Charge (Load) Imposed on Purchases	None
Purchase Fee	None
Sales Charge (Load) Imposed on Reinvested Dividends	None
Redemption Fee	None
Account Service Fee Per Year (for certain fund account balances below \$5,000,000)	\$25

Annual Fund Operating Expenses

(Expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.07%
12b-1 Distribution Fee	None
Other Expenses	0.02%
Total Annual Fund Operating Expenses	0.09%

Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same.

1 Year	3 Years	5 Years	10 Years
\$9	\$29	\$51	\$115

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 4% of the average value of its portfolio.

Principal Investment Strategies

The Fund employs an indexing investment approach designed to track the performance of the FTSE Global All Cap ex US Index (the “Target Index”), a float-adjusted, market capitalization-weighted index designed to measure equity market performance of companies located in developed and emerging markets, excluding the United States. Under normal circumstances, the Fund invests at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in the stocks that make up the Target Index. The Fund uses the replication method of indexing, meaning that the Fund generally holds the same stocks as those in its Target Index and in approximately the same proportions.

Principal Risks

As with any investment, an investment in the Fund could lose money over any time period. The Fund’s share price and total return may fluctuate, potentially within a wide range. The principal risks of investing in the Fund are summarized below. Each of the following risks could affect the Fund’s performance:

- **General Market Risk.** The markets in which the Fund invests can be affected by a variety of factors. These factors, which can be real or perceived, may include economic, market, political, and regulatory conditions and developments as well as local, regional, or global events such as wars, military conflicts, natural disasters, and public health issues. In addition, investor sentiment and expectations regarding these factors can also impact the markets. Different parts of the market, including different industries and sectors as well as different types of securities, may react differently to factors that affect the market. These factors can contribute to market uncertainty, market volatility, and fluctuations in the value of the Fund’s investments, thereby resulting in potential losses to the Fund over short or long periods.
- **Investing in Foreign Markets.** Foreign markets can perform differently than U.S. markets. World events could adversely affect the value and/or liquidity of securities of foreign companies or foreign issuers, potentially in ways that differ from impacts to U.S. companies or issuers. Further, global economies and financial markets are becoming increasingly interconnected, which increases the possibility that conditions in one country or region could adversely impact a different country or region. In addition, the rights and remedies associated with investments in a fund that invests in foreign

securities may be different than a fund that invests in domestic securities. To the extent that the Fund invests a large portion of its assets in securities of issuers located primarily in one country or region, the Fund's performance may be hurt disproportionately by the poor performance of its investments in such country or region.

- **Investing in Emerging Markets.** Investments in emerging markets are subject to higher degrees of risk and volatility than investments in developed markets. Compared with developed markets, emerging markets can have greater custodial and operational risks; less developed legal, tax, regulatory, financial reporting, accounting, and recordkeeping systems; and greater political, social, and economic instability than developed markets. In addition, emerging markets generally have less efficient trading markets with lower overall liquidity and more volatile currency exchange rates. Each of these risks can cause losses to the Fund's investments and/or impact the Fund's performance.
- **Currency Risk.** The Fund is subject to the risk that foreign currency will perform differently than U.S. dollars and increase the potential loss to the Fund. Currency exchange rates may be volatile, move rapidly, and change as a result of changes in interest rates, inflation rates, government surpluses or deficits, and monetary policy or currency controls imposed by local governments or supranational entities such as the International Monetary Fund. Changes in currency exchange rates can affect the value of the Fund's holdings.
- **Investments Economically Tied to China.** The risks described under **Investing in Foreign Markets**, **Investing in Emerging Markets**, and **Currency Risk** apply to, and may be heightened with respect to, the Fund's investments in companies or issuers economically tied to China. The Fund also is subject to unique risks due to the considerable degrees of social and humanitarian, legal, regulatory, political, and economic uncertainty associated with investments in companies or issuers economically tied to China. All of these factors, among others, could have negative impacts on the Fund. For example, the Fund may not be able to access its desired amount of shares of companies incorporated in China that trade on the Shanghai and Shenzhen Stock Exchanges (A-shares) and/or the Hong Kong Stock Exchange (H-shares), which may cause the Fund to miss out on investment opportunities. Investments economically tied to China may be (or become in the future) restricted or sanctioned by the U.S. government, which could cause these securities to decline in value or become less liquid. If the Fund's holdings become impacted by restrictions or sanctions, the Fund may incur losses. Additionally, the Fund may gain exposure to certain companies in China through legal structures known as variable interest entities (VIEs), which provide exposure to Chinese companies through contractual arrangements instead of equity ownership. Investing through a VIE does not offer the same level of investor protection as direct ownership and is subject

to risks including breach of the contractual arrangements, difficulty in enforcing the contractual arrangements outside of the United States, and intervention by the U.S. government. These risks could significantly affect a VIE's market value, which in turn could impact the Fund's performance.

- **Investing in Equity Markets.** The Fund invests in the equity markets. Equity markets have historically been cyclical, having periods of time when stock values rise and fall. Market volatility can lead to significant fluctuations in stock values, resulting in potential losses to the Fund.
- **Market Capitalization (Market Cap).** Companies are generally classified into three types of market cap depending on their size: small-, mid-, and large-cap. Companies can be further classified into micro- or mega-cap. Different factors can affect each market cap uniquely, and historically small- and mid-cap stocks have typically been more volatile due to the effects of changing economic conditions. Large companies may not reach the same levels of growth or performance as smaller companies, and they may be slower to react to competitive challenges. The performance of funds that invest in a subset of market caps could diverge from the performance of a fund that is focused on a broader representation of the stock market.
- **Index Investing.** The Fund is subject to risks associated with index investing. Because the Fund generally seeks to track the performance of the Target Index regardless of how the Target Index is performing, the Fund's performance may be lower than it would be if it were actively managed. Although the Fund seeks to hold substantially all of the securities included in the Target Index, it may be unable to do so. In addition, the Fund could be prevented from holding one or more securities in the same proportion as in the Target Index. The performance of the Fund's investments, in the aggregate, may not match the investment performance of the Target Index. This risk, known as tracking error risk, may be heightened during times of increased market volatility or under other unusual market conditions. The Fund also could be negatively impacted by changes to the Target Index made by the Index Provider or by errors made by the Index Provider. Any gains, losses, or costs associated with or resulting from an error made by the Index Provider will generally be borne by the Fund and, as a result, the Fund's shareholders.
- **Concentration Risk.** Except as may be necessary to approximate the composition of its Target Index, the Fund will not concentrate its investments in the securities of issuers whose principal business activities are in the same industry or group of industries. If the Target Index becomes concentrated and the Fund needs to concentrate in the same industry or group of industries, its performance could be negatively impacted by the industry or industries in which it is concentrated.

An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

Annual Total Returns

The following bar chart and table show the Fund's historical performance and are intended to help you understand the risks of investing in the Fund. The bar chart shows how the performance of the Fund's Admiral Shares has varied from one calendar year to another over the periods shown. The table shows how the average annual total returns of the Admiral Shares compare with those of a broad-based securities market index. FTSE Global All Cap ex US Index returns are adjusted for withholding taxes applicable to U.S.-based mutual funds organized as Delaware statutory trusts. Keep in mind that the Fund's past performance (before and after taxes) does not indicate how the Fund will perform in the future. Updated performance information is available on our website at vanguard.com/performance.

Annual Total Returns — Vanguard Total International Stock Index Fund Admiral Shares

During the periods shown in the bar chart, the highest and lowest returns for a calendar quarter were:

	Total Return	Quarter
Highest	18.11%	June 30, 2020
Lowest	-24.30%	March 31, 2020

Average Annual Total Returns for Periods Ended December 31, 2025

	1 Year	5 Years	10 Years
Vanguard Total International Stock Index Fund Admiral Shares			
Return Before Taxes	32.18%	7.93%	8.51%
Return After Taxes on Distributions	31.03	7.05	7.68
Return After Taxes on Distributions and Sale of Fund Shares	19.58	6.01	6.69
FTSE Global All Cap ex US Index (reflects no deduction for fees or expenses)			
	31.95%	8.04%	8.56%

Actual after-tax returns depend on your tax situation and may differ from those shown in the preceding table. When after-tax returns are calculated, it is assumed that the shareholder was in the highest individual federal marginal income tax bracket at the time of each distribution of income or capital gains or upon redemption. State and local income taxes are not reflected in the

calculations. Please note that after-tax returns are shown only for the Admiral Shares and may differ for each share class. After-tax returns are not relevant for a shareholder who holds fund shares in a tax-deferred account, such as an individual retirement account or a 401(k) plan. Also, figures captioned *Return After Taxes on Distributions and Sale of Fund Shares* may be higher than other figures for the same period if a capital loss occurs upon redemption and results in an assumed tax deduction for the shareholder.

Investment Advisor

The Vanguard Group, Inc. (Vanguard) through its wholly owned subsidiary, Vanguard Capital Management (VCM). VCM exercises portfolio management responsibilities for the Fund.

Portfolio Managers

Christine D. Franquin, Principal of Vanguard and Portfolio Manager at VCM. She has co-managed the Fund since 2017.

Michael Perre, Principal of Vanguard and Portfolio Manager at VCM. He has managed the Fund since 2008 (co-managed since 2016).

Jeffrey D. Miller, Portfolio Manager at VCM. He has co-managed the Fund since 2025.

Purchase and Sale of Fund Shares

If you invest directly with Vanguard, you may purchase or redeem shares online through our website (*vanguard.com*), by mail (The Vanguard Group, P.O. Box 982901, El Paso, TX 79998-2901), or by telephone (800-662-2739). The minimum investment amount required to open a Fund account for Admiral Shares is generally \$3,000. The minimum investment amount required to add to an existing Fund account is generally \$1.

Financial intermediaries, institutional clients, and Vanguard-advised clients should contact Vanguard for information on special eligibility rules that may apply to them regarding Admiral Shares. If you invest in Vanguard fund shares indirectly through an intermediary (including investing in shares through a brokerage account offered by Vanguard Brokerage Services[®]), please contact that firm directly for more information regarding your eligibility. If you invest in Vanguard fund shares through an employer-sponsored retirement or savings plan, your plan administrator or your benefits office can provide you with detailed information on how you can invest through your plan.

Tax Information

The Fund's distributions may be taxable as ordinary income or capital gains. If you are investing through a tax-advantaged account, such as an IRA or an employer-sponsored retirement or savings plan, special tax rules apply. You should consult your own tax advisor with respect to any particular U.S. or non-U.S. tax consequences of your investment in the Fund.

Payments to Financial Intermediaries

The Fund and its advisor do not pay financial intermediaries for sales of Fund shares.

More on the Fund

This Prospectus provides information about Vanguard Total International Stock Index Fund, a series of Vanguard STAR Funds (the “Trust”). Reading this Prospectus will help you decide whether the Fund is the right investment for you.

As you consider an investment in the Fund, you should take into account your tolerance for fluctuations in the securities markets. The costs of investing are another important consideration. As a Fund shareholder, you will pay a proportionate share of the costs of operating the Fund and any transaction costs incurred when the Fund buys or sells securities, including costs generated by shareholders of other share classes to the extent the Fund offers more than one share class. These costs can erode a substantial portion of the gross income or the capital appreciation the Fund achieves. Even seemingly small differences can, over time, have a dramatic effect on the Fund’s performance.

Investment Objective and More on Principal Investment Strategies

In this section, you will find more information about the Fund’s investment objective and the principal investment strategies and policies that the Fund uses in pursuit of its investment objective. The Trust’s board of trustees (the “Board”) oversees the Fund’s management. The Board may approve changes to the Fund’s strategies or policies in the interest of shareholders without shareholder approval unless the strategy or policy is designated as fundamental.

Investment Objective

The Fund seeks to track the performance of a benchmark index that measures the investment return of stocks issued by companies located in developed and emerging markets, excluding the United States.

The Fund’s investment objective is not fundamental and may be changed without shareholder approval.

Implementation of Investment Objective

To achieve its investment objective, the Fund employs an indexing, or passive, investment approach designed to track the performance of its Target Index, the FTSE Global All Cap ex US Index.

What are Index Funds?

Index funds attempt to track—not outperform—the performance of a specified market index. An index is a group of securities whose overall performance is used as a standard to measure the investment performance of a particular market. Some indexes represent entire markets, such as the U.S. stock market, while others cover a segment of a market, such as short-term bonds.

One cannot invest directly in an index. Instead, an index fund’s advisor will typically seek to hold all, or substantially all, of the securities that make up the fund’s target index (often referred to as “replicating” an index or a “full replication” approach) or a representative sample of the securities that make up a fund’s target index (“sampling” an index).

Under normal circumstances, the Fund invests at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in the stocks that make up the Target Index. Investments in derivatives may be counted toward the Fund’s 80% policy to the extent that they provide investment exposure to the securities included within the policy or to one or more market risk factors associated with such securities. The Fund may change its 80% policy only upon 60 days’ notice to shareholders.

The Fund could become concentrated in an industry or group of industries if its Target Index becomes concentrated due to market conditions or the performance of a single or related group of issuers.

Security Selection

The Fund uses the replication method of indexing, meaning that the Fund generally holds the same stocks as those in its Target Index and in approximately the same proportions. The advisor buys and sells securities for the Fund for the purpose of tracking the Target Index.

The Target Index is derived from the FTSE Global Equity Index Series, which covers 98% of the world’s investable market capitalization. The Target Index is a float-adjusted, market-capitalization weighted index consisting of large, mid and small cap companies located in developed and emerging markets, excluding the United States. As of October 31, 2025, the number of stocks (constituents) in the Target Index was 8,492. The constituents are reviewed by the Index Provider on a semiannual basis and are likely to change over time.

The Target Index is owned, calculated, and controlled by the Index Provider in its sole discretion. Neither the advisor nor any of its affiliates has discretion to select Target Index components or change the Target Index’s methodology.

Stocks of publicly traded companies are often classified according to market capitalization, which is the market value of a company's outstanding shares. These classifications typically include small-cap, mid-cap, and large-cap. It is important to understand that there is no "official" definition of each type of small-cap, mid-cap, or large-cap and that market capitalization ranges can change over time.

A fund's median market capitalization, which is the midpoint of the market capitalization of the fund's stocks weighted by the proportion of the fund's assets invested in each stock, can be used as an indicator of the size of the companies in which it invests. Stocks representing half of a fund's assets will have market capitalizations above the median, and the rest will fall below it. As of October 31, 2025, the asset-weighted median market capitalization of the Fund's stock holdings was:

Vanguard Fund	Asset-Weighted Median Market Capitalization
Vanguard Total International Stock Index Fund	\$46 billion

Additional Information Regarding the Fund's Investments

The Fund's investments are described in more detail below.

- *Large-Cap Stocks* represent the largest publicly traded companies, which are often well-established and widely recognized. These companies typically have significant market share, global reach, and a history of financial stability. While they may not offer as much growth potential as smaller companies, they are generally considered more resilient during economic downturns but still not immune from a decrease in price.
- *Mid-Cap Stocks* represent medium-sized companies, which can be companies that are more established than small-cap companies but do not have the market share of large-cap companies. These companies may be more agile than large-cap companies in responding to market changes, while also benefiting from more resources and operational maturity than small-cap companies. However, they can still face challenges during economic downturns.
- *Small-Cap Stocks* represent smaller companies, which may be newer or operate in niche markets. These companies can offer higher growth potential than larger companies and may be more agile in adapting to market changes. However, they also face greater risks, such as limited access to capital and vulnerability during economic downturns.

More on Fund Risks

Investing in the securities markets can result in a loss of principal. The Fund is subject to a variety of risks, including the principal risks listed below, that can impact its net asset value (NAV), performance, and ability to achieve its investment objective.

More on Principal Risks

General Market Risk. The markets in which the Fund invests can be affected by a variety of factors. These factors, which can be real or perceived, may include economic, market, political, and regulatory conditions and developments as well as local, regional, or global events such as wars, military conflicts, natural disasters, and public health issues. In addition, investor sentiment and expectations regarding these factors can also impact the markets. Different parts of the market, including different industries and sectors as well as different types of securities, may react differently to factors that affect the market. These factors can contribute to market uncertainty, market volatility, and fluctuations in the value of the Fund's investments, thereby resulting in potential losses to the Fund over short or long periods.

Investing in Foreign Markets. Foreign markets can perform differently than U.S. markets. World events could adversely affect the value and/or liquidity of securities (including depositary receipts) of foreign companies or foreign issuers, potentially in ways that differ from impacts to U.S. companies or issuers. Further, global economies and financial markets are becoming increasingly interconnected, which increases the possibility that conditions in one country or region could adversely impact a different country or region. In addition, the rights and remedies associated with investments in a fund that invests in foreign securities may be different than a fund that invests in domestic securities. The performance of a fund that invests significantly in one or more countries or regions will be closely tied to factors within that country or region. These factors may include currency, economic, political, and/or regulatory conditions and developments. Therefore, the Fund's performance may be affected disproportionately compared to a fund that does not invest significantly in such countries or regions.

Investing in Emerging Markets. Investing in emerging markets presents additional risks and volatility compared to investing in developed markets. These risks include less developed tax, financial reporting, accounting, and recordkeeping systems. Governments in emerging market countries may intervene in the economy by imposing capital controls, nationalizing industries, or placing restrictions on foreign ownership. The legal structure in these markets may also be less developed, making it difficult for investors to pursue legal remedies or enforce judgments. Regulatory frameworks may be less

stringent, leading to greater risks with respect to the custody of securities and compliance with local laws. Additionally, these markets may face hyperinflation, currency devaluation, and trade disputes.

Exchanges in emerging market countries are often less efficient, with lower overall liquidity, potentially leading to increased volatility and difficulties in valuing investments. These challenges can also occur due to limited, incomplete, or inaccurate information regarding issuers, who may not be subject to the same standards as those in developed markets. Currency exchange rates are typically more volatile which magnifies the risks associated with investments in emerging markets. Additionally, these markets may encounter restrictions (such as sanctions, embargoes, or tariffs), manipulation, or other unfavorable actions. Each of these risks can cause losses to the Fund's investments and/or impact the Fund's performance.

Currency Risk. The Fund is subject to the risk that foreign currency will perform differently than U.S. dollars and increase the potential loss to the Fund. Currency exchange rates may be volatile, move rapidly, and change as a result of changes in interest rates, inflation rates, government surpluses or deficits, and monetary policy or currency controls imposed by local governments or supranational entities such as the International Monetary Fund. Changes in currency exchange rates can affect the value of the Fund's holdings.

Investments Economically Tied to China. The Fund's investments in companies economically tied to China subject the Fund to risks not typically associated with investments in more established markets. Investments in companies or issuers economically tied to China are subject to all of the foreign market risks described in this Prospectus, as well as to the unique risks and considerations discussed below. Foreign market risks (**Investing in Foreign Markets, Investing in Emerging Markets, Currency Risk, and Geopolitical and Sanctions Risk**) may be more pronounced with respect to the Fund's investments economically tied to China or for the Fund as a whole. Each of these factors could increase the Fund's volatility, cause the Fund to incur losses, or otherwise impact the Fund's performance.

Investments in companies or issuers economically tied to China are associated with considerable degrees of social and humanitarian, legal, regulatory, political, and economic uncertainty. For example, the Chinese government has historically exercised authority over publicly traded Chinese companies and may continue to do so. This authority can include, but is not limited to, dictating what types of products Chinese companies should produce and to whom such products can be sold, nationalizing or seizing assets, and pursuing regulatory enforcement in an unpredictable manner. The Chinese government's monetary policy, which may include restricting currency access or devaluing Chinese currency, could have a negative impact on the Fund's ability to effectively trade in the Chinese markets. China has ongoing disputes with Hong Kong, Taiwan, the Xinjiang region and the Uyghur population, and other neighboring areas.

These disputes continue to escalate due to ongoing Chinese military exercises (such as land reclamation efforts in the South China Sea), policymaking within China, assertions of human rights violations by the UN and other developed nations, and statements from high-ranking Chinese government officials. In addition, the Chinese government has been accused of participating in state-sponsored cyberattacks against other foreign countries and foreign companies. Concerns have also been raised regarding Chinese companies that engage in activities that potentially pose a national security threat to the United States and other countries. Actual or threatened responses to these activities, including sanctions or other restrictions (such as tariffs or embargoes) imposed by the United States or other countries, can significantly impact the Chinese economy and companies or issuers economically tied to China. The Chinese government may also itself impose trade restrictions on Chinese companies. Compliance with sanctions could lead to a large market selloff, which could result in significant losses to the Fund if the Fund holds securities that are sanctioned. All of these factors could cause the Fund's investments in companies or issuers economically tied to China to decline in value or become less liquid.

The Fund may be subject to additional risks depending on the types of Chinese securities in which it invests and how it gains exposure to those securities. Companies incorporated in China can issue different types of shares depending on the exchange on which the shares will trade and the types of investors to whom the shares will be available. For example, *A-shares* are traded on the Shanghai and Shenzhen Stock Exchanges and are available to the Fund through the China Stock Connect program ("Stock Connect") or with a license granted under the qualified foreign investor ("QFI") framework. To the extent that the Fund invests in *A-shares*, the Fund is subject to the risk that it will not be able to access its desired amount of *A-shares* through Stock Connect or a QFI license. There is no guarantee that the Chinese government will continue to allow investment through Stock Connect and/or the QFI framework. Investing through these channels is also subject to trading restrictions and suspensions and operational, clearing, and settlement risks. *H-shares* are traded on the Hong Kong Stock Exchange and are generally available to all investors, but their use is subject to risk because the Hong Kong stock market may have little to no correlation to the performance of the mainland Chinese stock market.

The Fund may also gain exposure to Chinese companies through legal structures known as variable interest entities ("VIEs"), which provide exposure to a Chinese company through contractual arrangements instead of equity ownership. Investing through a VIE does not offer the same level of investor protection as direct ownership and is subject to risks including breach of the contractual arrangements, difficulty in enforcing the contractual arrangements outside of the United States, and intervention by the Chinese government. These risks could significantly affect a VIE's market value, which in turn could impact the Fund's performance.

Investing in Equity Markets. The Fund invests in the equity markets. Equity markets have historically been cyclical, having periods of time when stock values rise and fall. These periods of rising and falling values can occur for unpredictable timeframes over the short and long term. Market volatility also is unpredictable and can lead to significant fluctuations in stock values, resulting in potential losses to the Fund.

Market Capitalization (Market Cap). Companies are generally classified into three types of market cap depending on their size: small-, mid-, and large-cap. Companies can be further classified into micro- or mega-cap. Different factors can affect each market cap uniquely, and historically small- and mid-cap stocks have typically been more volatile due to the effects of changing economic conditions. Large companies may not reach the same levels of growth or performance as smaller companies, and they may be slower to react to competitive challenges. The performance of funds that invest in a subset of market caps could diverge from the performance of funds that are focused on a broader representation of the stock market.

Index Investing. The Fund is subject to the following risks associated with index investing:

Passive Management. The Fund seeks to track the performance of its Target Index regardless of how the Target Index is performing. The advisor's use of an indexing, or passive, approach to select and maintain investments for the Fund means that the advisor will select investments for the purpose of tracking the Target Index and generally will not use strategies to reduce negative impacts to the Fund during periods of market volatility. As a result, the Fund's performance may be lower than it would be if it were actively managed.

Index Replication Strategy. Although the Fund seeks to hold substantially all of the securities included in its Target Index, it may be unable to do so. In addition, the Fund could be prevented from holding one or more of the securities in the same proportion as in the Target Index.

Tracking Error. The performance of the Fund's investments, in the aggregate, may not match the investment performance of its Target Index. It is important to understand that an index fund will never perform exactly the same as its target index because, among other things, an index fund has operating expenses and transaction costs and its target index does not. Beyond these inherent differences in the operation of an index fund versus the operation of its target index, there are a variety of other factors that can cause or result in tracking error. These may include, but are not limited to:

- Price differences between the securities held by the index fund and those included in its target index
- Cash flows into or out of the index fund
- The size of the index fund

- Compliance with new or existing regulatory requirements
- Portfolio transactions carried out by the index fund's advisor to minimize the distribution of capital gains
- Changes to the underlying securities that make up the target index
- Errors made by the provider of the target index

Tracking error risk may be heightened during times of increased market volatility or under other unusual market conditions. An index fund using a sampling strategy may be more likely to experience tracking error than an index fund using a replicating strategy.

Index Provider. The Fund is subject to risks associated with its Index Provider. The securities that make up the Target Index and their weighting in the Target Index are determined by the Index Provider. The Index Provider does not provide any warranty or accept any liability with respect to the quality, accuracy, or completeness of the Target Index or any data used to compile the Target Index. Under normal circumstances, the Index Provider rebalances (updates) the Target Index on a regular schedule. However, the Index Provider may also rebalance the Target Index outside of the regular schedule or delay or cancel a scheduled rebalance, which could result in added costs for the Fund or cause the Fund to experience tracking error. The Index Provider may make errors, and it is possible that such errors may not be identified by the Index Provider for a period of time or at all. Any gains, losses, or costs associated with or resulting from an error made by the Index Provider will generally be borne by the Fund and, as a result, the Fund's shareholders. The Fund's advisor does not provide any warranty or guarantee against any errors made by the Index Provider.

Concentration Risk. Except as may be necessary to approximate the composition of its Target Index, the Fund will not concentrate its investments in the securities of issuers whose principal business activities are in the same industry or group of industries. However, it is possible that the Target Index could become concentrated due to market conditions or the performance of a single or related group of issuers. If the Target Index becomes concentrated and the Fund needs to concentrate in the same industry or group of industries, its performance could be negatively impacted by the industry or industries in which it is concentrated.

Additional Risks

Geopolitical and Sanctions Risk. Due to growing dependencies between global economies, geopolitical events can negatively affect all securities, markets, and economies. It is possible that events which only impact one geographic area could have negative short- or long-term effects on markets, issuers, and/or exchanges in the United States and other countries.

At times, the United States, other governments, or other supranational bodies (e.g., the United Nations) may impose sanctions on countries and/or entities in response to geopolitical events or other priorities. Compliance with sanctions could impact the Fund, including the Fund's ability to transact in or obtain exposure to certain foreign securities and assets. Sanctions also could cause significant losses to the Fund's investments and its performance could be negatively impacted. In lieu of sanctions, companies or specific goods that the company produces could be subjected to trade embargoes or tariffs, which can also affect securities markets and create volatility. So long as sanctions do not prohibit investment in the company or issuer, the Fund typically also would not be prohibited from investing in the affected company or issuer.

Potential Redemption Activity Impacts. The Vanguard funds can be negatively impacted by certain large redemptions. These redemptions could occur due to a single shareholder or multiple shareholders deciding to sell a large quantity of shares of a fund or a share class of the fund. Large redemptions can occur for many reasons, either as a result of actions taken by the Vanguard funds or their advisors, or as a result of events unrelated to actions taken by the Vanguard funds or their advisors. Actions taken by the Vanguard funds or their advisors could include, but are not limited to, changes to a fund's advisor(s), changes to a fund's portfolio manager(s), changes to the composition of a fund's portfolio, and/or other product changes or launches that, for example, result in shareholders redeeming shares of one fund to purchase shares of another fund or investment vehicle. For a fund of funds, actions taken by the Vanguard funds or their advisors could include a withdrawal from an underlying fund or a change in the allocation to underlying funds. Events unrelated to actions taken by the Vanguard funds or their advisors could include shareholders selling out of a fund in response to market movements or regulatory changes.

A large redemption could adversely affect a fund's liquidity and NAV. For example, a large redemption could require a fund's manager to sell portfolio holdings at unplanned or inopportune times. The manager's sale of these holdings, which is a taxable event, could require the fund to distribute any corresponding capital gains or other taxable income to the fund's remaining shareholders; see *Dividends, Distributions, and Taxes* in the **Investing in Vanguard Funds** section for additional information. The increased trading activity could also increase underlying costs for the fund due to commissions paid by the fund. When large redemptions occur, the Vanguard funds reserve the right to pay all or part of the redemptions in-kind and/or delay payment of the redemption proceeds for up to seven calendar days; see "Methods Used to Meet Redemption Requests" under *Purchase, Redemption, and Exchange of Fund Shares* in the **Investing in Vanguard Funds** section.

Investing in Derivatives. Investing in derivatives may present risks different from, and/or greater than, those associated with investing directly in stocks, bonds, or other types of investments. Derivatives could expose the Fund to increased volatility and/or significant loss. Certain derivatives have an inherent leverage component, providing the Fund exposure to a sizable position in an underlying asset with a relatively small upfront investment at the time the Fund enters into the derivatives position. For these derivatives, an adverse change in the value or price of the underlying asset could result in a loss substantially greater than the amount invested in the derivative itself. Some derivatives require the Fund to enter into a contract with a counterparty. If the counterparty is unable or unwilling to fulfill its contractual obligation, the Fund may experience a loss. A liquid market may not always exist for the Fund's derivatives positions. The Fund may be unable to sell or otherwise exit its derivatives position at desired times or prices, which could also result in a loss to the Fund. Some derivatives, particularly OTC derivatives, can be complex and often are valued subjectively. Valuation may be more difficult in times of market turmoil since many investors and market makers may be reluctant to purchase complex instruments or quote prices for them. Improper valuations can result in increased cash payment requirements to counterparties or a loss of value to the Fund.

Derivatives may not perform as intended, which may result in losses to the Fund. For example, derivatives used for hedging or as a substitute for a portfolio instrument may not provide the expected benefits, particularly during adverse market conditions. The use of derivatives is also subject to legal risk, which includes the risk of loss resulting from insufficient or unenforceable contractual documentation, insufficient capacity or authority of the Fund's counterparty, and operational risk, which includes documentation or settlement issues, system failures, inadequate controls, and human error.

Ownership Limitations Risk. As the Vanguard funds continue to grow, they may be increasingly impacted by ownership limitations that apply to certain securities held by the Vanguard funds ("limited securities"). An ownership limitation restricts the amount of a security that funds within the same fund complex or funds advised by the same investment advisor can own. These limitations may apply even where an external manager or different affiliate of Vanguard provides investment advisory services to a fund. Ownership limitations restrict the amount that funds can invest in certain securities, due to either regulatory limits that apply to certain industries (for example, banking and utilities) or mechanisms that some issuers have in place to deter takeover attempts (for example, poison pills). These restrictions can have negative impacts on funds, including the inability of an index fund to track its index, the inability of a fund to meet its investment objectives, negative performance impacts, and unanticipated tax consequences. The impact of a particular ownership limitation on a Vanguard fund will vary based on several factors, including, but not limited to, a fund's investment strategy and its current and

desired exposure to limited securities, the industry to which the limitation applies, the country or region of a particular issuer, and the regulatory body imposing the limitation. In addition to the impacts of specific ownership limitations, the Vanguard funds are also subject to the risk of multiple ownership limitations applying at one time, which could increase the likelihood of a fund experiencing the negative impacts listed above. The Vanguard funds attempt to mitigate the impacts of ownership limitations through the various methods discussed below in “Methods to address ownership limitations.” However, it is possible that these methods will be unsuccessful and could also expose the Vanguard funds to other potential risks and negative consequences.

Impacts of Ownership Limitations. When an ownership limitation applies, the Vanguard funds may need to allocate ownership of impacted securities across impacted Vanguard funds, and a Vanguard fund may not be able to buy additional securities or continue to hold existing securities above its allocated amounts. For index funds, this can result in tracking error if a fund cannot buy or hold the securities it needs in order to replicate or sample its target index. For active funds, this can result in a fund not being able to take advantage of favorable opportunities to invest in securities that are subject to limitations. For both index and active funds, the inability to buy or hold securities could prevent a fund from being able to meet its investment objective or invest in accordance with its investment strategy, and/or could negatively impact the fund’s performance. In addition, the steps taken to address ownership limitations could result in additional costs and/or unanticipated tax consequences to a fund that affect the amount, timing, and character of distributions to the fund’s shareholders. The more assets the Vanguard funds hold, the more likely it is that ownership limitations will negatively impact Vanguard funds because they will not be able to purchase additional shares of limited securities above their allocated amounts in order to fully invest their assets in accordance with their investment strategies.

Methods to Address Ownership Limitations. The Vanguard funds try to manage the negative impacts of these ownership limitations on the Vanguard funds by seeking permission (relief) from regulators and/or issuers to purchase or hold more securities than the amount allowed by ownership limitations. However, it is not always possible to secure relief and such relief could be revoked if the Vanguard funds are unable to satisfy the applicable conditions, or if the regulator or issuer changes its position or policy or if the applicable legal requirements become more restrictive. There is an increasing amount of uncertainty around how much ownership limitations relief regulators will grant to asset managers like Vanguard. Given this uncertainty, there is no guarantee that Vanguard or the Vanguard funds will be able to maintain their existing relief or obtain additional relief from ownership limitations in the future. A regulator may impose certain conditions on the Vanguard funds in connection with granting relief from an ownership limitation, including, for example, that the funds vote in a certain way with respect to shares of the limited security that the

Vanguard funds hold in excess of the ownership limitation. Regulatory relief may also depend on the operational independence of certain Vanguard subsidiaries and/or business divisions.

In addition, the relief upon which Vanguard and the Vanguard funds currently rely, which has allowed Vanguard to exceed certain ownership limitations, could be reduced or revoked, forcing the Vanguard funds to sell down one or more securities to comply with the ownership limitations. If a fund has to sell securities, there could be negative impacts to fund performance as well as unanticipated tax consequences that could impact the amount, timing, and character of distributions to the fund's shareholders.

When a Vanguard fund cannot buy or hold securities directly due to ownership limitations, the fund will typically try to get indirect exposure to impacted securities. The fund does this so that it can replicate as closely as possible the returns the fund would get if it directly owned the impacted securities. Indirect exposure can be accomplished through the use of derivatives, such as total return swaps, or by investing in wholly owned subsidiaries that hold the impacted securities. Both of these methods of obtaining indirect exposure increase fund costs, and, depending on the extent to which these alternatives are used by a fund to avoid exceeding ownership limits, the added costs could have a negative impact on the fund's performance. With respect to an index fund, these added costs could also result in tracking error relative to the fund's target index. The risks associated with derivatives use are discussed in more detail elsewhere in this Prospectus.

There is no guarantee that laws and regulations always will allow that indirect exposure to limited securities may be omitted for purposes of determining the Vanguard funds' exposure to limited securities and compliance with the applicable ownership limitations. In such circumstances, the Vanguard funds could not use these techniques and would be required to sell down the indirect and/or direct holdings in the applicable limited securities.

Other Investment Policies

In addition to employing its principal investment strategies, the Fund may use the following other investment strategies and types of investments in order to achieve its investment objective.

Substitute Index

The Fund reserves the right to substitute a different index for the index it currently tracks if the current index is discontinued, if the Fund's agreement with the provider of its Target Index is terminated, or for any other reason determined in good faith by the Board. In any such instance, the substitute index would represent the same market segment as the Target Index.

Other Types of Investments

The Fund may invest in derivatives such as total return swaps, equity futures, foreign currency exchange forward contracts, or other derivatives. In general, a derivative is a financial contract whose value is based on the value of a financial asset (such as a stock, a bond, or a currency), a physical asset (such as gold, oil, or wheat), a market index, or a reference rate. The Fund attempts to remain fully invested in stocks in order to track the Target Index as closely as possible; however, to help stay fully invested and to reduce transaction costs, the Fund may invest in derivatives. The Fund may use derivatives to obtain exposure to a stock, a basket of stocks, or an index. Derivatives may also be used as an alternate means to obtain economic exposure if the Fund is required to limit its investment in a particular issuer or industry. The Fund will not use derivatives for speculation or for the purpose of leveraging (magnifying) investment returns.

The Fund may enter into foreign currency exchange forward contracts in order to maintain the same currency exposure as its index. A foreign currency exchange forward contract is an agreement to buy or sell a currency at a specific price on a specific date, usually 30, 60, or 90 days in the future. In other words, the contract guarantees an exchange rate on a given date. These contracts, however, would not prevent the Fund's securities from falling in value as a result of risks other than unfavorable currency exchange movements. The Fund may use these contracts to manage currency exposure and to settle trades in a foreign currency.

The Fund may also invest in convertible securities and warrants. Convertible securities are securities that may be converted at either a stated price or a stated rate into underlying shares of common stock. Warrants are securities that permit their owners to purchase a specific number of stock shares at a predetermined price in the future.

In most cases, the Fund invests directly in the components of its Target Index. However, the Fund also reserves the right to obtain indirect economic exposure to an index component by purchasing a depositary receipt representing an interest in that component. Depositary Receipts, also sold as participatory notes, are securities that are listed on exchanges or quoted in over-the-counter markets in one country, but represent shares of issuers domiciled in another country. The Fund has the ability to invest in foreign issuers through American Depositary Receipts (ADRs), European Depositary Receipts (EDRs), Global Depositary Receipts (GDRs), or similar investment vehicles. Generally, the Fund will purchase depositary receipts only when the advisor believes that the Fund would benefit from holding the depositary receipt rather than the underlying index component. For example, the Fund might opt to hold a depositary receipt if the foreign market in which an index component trades does not provide adequate protection to the rights of foreign investors, or if a foreign regulator places restrictions on the free flow of capital or currency. For purposes of any investment policy or other requirement related to the

percentage of index components held by the Fund, depositary receipts that represent an interest in an index component are treated by the Fund as index components.

Cash Management

The Fund's daily cash balance may be invested in one or more Vanguard CMT Funds, which are used as cash management vehicles for the Vanguard funds. When investing in a CMT Fund, the Fund bears its proportionate share of the expenses of the CMT Fund in which it invests. Vanguard receives no additional revenue from Fund assets invested in a CMT Fund.

Temporary Defensive Measures

The Fund may temporarily depart from its normal investment policies and strategies when the advisor believes that doing so is in the Fund's best interest, so long as the strategy or policy employed is consistent with the Fund's investment objective. For instance, the Fund may invest beyond its normal limits in derivatives or exchange-traded funds that are consistent with the Fund's investment objective when those instruments are favorably priced or provide needed liquidity, as might be the case when the Fund receives large cash flows that it cannot prudently invest immediately. The Fund may also invest beyond its normal limits in derivatives as an alternate means to obtain economic exposure if the Fund is required to limit its investment in a particular issuer or industry.

Portfolio Holdings

Please consult the Fund's *Statement of Additional Information* or Vanguard's website for a description of the policies and procedures that govern disclosure of the Fund's portfolio holdings.

Management and Distribution of the Fund

The Fund is a member of The Vanguard Group, Inc. (Vanguard), a family of over 200 funds. All of the funds that are members of Vanguard (other than funds of funds) share in the expenses associated with administrative services and business operations, such as personnel, office space, and equipment.

Vanguard Marketing Corporation provides marketing services to the funds. Although fund shareholders do not pay sales commissions or 12b-1 distribution fees, each fund (other than a fund of funds) or each share class of a fund (in the case of a fund with multiple share classes) pays its allocated share of the Vanguard funds' marketing costs.

How is Vanguard's Corporate Structure Unique?

Vanguard is owned jointly by the funds it oversees and thus indirectly by the shareholders in those funds. Most other mutual funds are operated by management companies that are owned by third parties—either public or private stockholders—and not by the funds they serve.

Investment Advisor

The Vanguard Group, Inc., P.O. Box 2600, Valley Forge, PA 19482, which began operations in 1975, serves as advisor to the Fund through Vanguard Capital Management (VCM). VCM exercises portfolio management responsibilities for the Fund. As of October 31, 2025, Vanguard served as advisor for approximately \$9.8 trillion in assets. Vanguard, through VCM, provides investment advisory services to the Fund pursuant to the Funds' Service Agreement and subject to the supervision and oversight of the trustees and officers of the Fund.

VCM, P.O. Box 2600, Valley Forge, PA 19482, is a wholly owned subsidiary of Vanguard and was established in 2025.

For the fiscal year ended October 31, 2025, the advisory expenses represented an effective annual rate of 0.01% of the Fund's average net assets.

The Fund reserves the right to utilize a multimanager approach in the future. Under the terms of an SEC exemption, the Board may, without prior approval from shareholders, change the terms of an advisory agreement with a third-party investment advisor or hire a new third-party investment advisor—either as a replacement for an existing advisor or as an additional advisor. Any significant change in the Fund's advisory arrangement will be communicated to shareholders in writing. As Vanguard is the Fund's sponsor and overall manager, Vanguard, through VCM, may provide investment advisory services to the Fund under certain circumstances. Vanguard may also recommend to the Board that an advisor be hired, terminated, or replaced or that the terms of an existing advisory agreement be revised. The Fund has filed an application seeking an SEC exemption with respect to investment advisors that are wholly owned subsidiaries of Vanguard. If the exemption is granted, the Fund may rely on the new SEC relief.

A discussion regarding the basis for the Board's approval of the Fund's investment advisory arrangement is available in the Fund's Form N-CSR filed with the SEC for the fiscal period ended April 30 and in the applicable Financial Statements and Other Information document available on the Fund's website.

The managers primarily responsible for the day-to-day management of the Fund are:

Christine D. Franquin, Principal of Vanguard and Portfolio Manager at VCM. She has managed investment portfolios since joining Vanguard in 2000 and has co-managed the Fund since 2017. Education: B.A., Universitaire Faculteiten Sint-Ignatius Antwerpen, Belgium; J.D., University of Liege, Belgium; M.S., Clark University.

Michael Perre, Principal of Vanguard and Portfolio Manager at VCM. He has been with Vanguard since 1990, has managed investment portfolios since 1999, and has managed the Fund since 2008 (co-managed since 2016). Education: B.A., Saint Joseph's University; M.B.A., Villanova University.

Jeffrey D. Miller, Portfolio Manager at VCM. He has been with Vanguard since 1999, has managed investment portfolios since 2010, and has co-managed the Fund since 2025. Education: B.A., The Pennsylvania State University; M.B.A., Drexel University.

The Fund's *Statement of Additional Information* provides information about each portfolio manager's compensation, other accounts under management, and ownership of shares of the Fund.

Investing in Vanguard Funds

In this section, you will find information regarding buying and selling Vanguard fund shares. Vanguard reserves the right to change the policies in this section without notice. Please call or visit our website for current information. See **Contacting Vanguard**.

The availability of certain Vanguard fund share classes and/or shareholder services described in this Prospectus will depend on the policies and procedures of the different accounts or investment products through which you hold your Vanguard fund shares. Vanguard fund shares can be held indirectly through financial intermediaries, or through investment products that use the funds as underlying investments such as employer-sponsored retirement or savings plans. In certain circumstances, Vanguard fund shares can be held directly with Vanguard.

If you hold Vanguard fund shares through accounts maintained by a financial intermediary, such as your securities dealer, broker, investment advisor, bank, other financial institution, **including shares held in a brokerage account with Vanguard Brokerage Services**[®], or through an investment product such as an employer-sponsored retirement or savings plan, please consult your financial intermediary to determine which share classes are available to you and to learn about other rules that apply to your accounts. Your financial intermediary may impose rules that differ from, and/or charge a transaction or other fee in addition to, those described in this Prospectus. Please consult your financial intermediary for details. If you hold Vanguard fund shares through an employer-sponsored retirement or savings plan, your plan administrator or your employee benefits office can provide you with detailed information on how to participate in your plan and how to elect a Vanguard fund as an investment option.

If you hold Vanguard fund shares directly with Vanguard, you should carefully read each topic within this section that pertains to investing directly with Vanguard. Vanguard reserves the right, upon reasonable notice, to discontinue the ability to hold Vanguard fund shares directly with Vanguard for any or all investors and/or to transfer such shares to an affiliate or other financial institution. For more information regarding your account and the shareholder services offered through your account, you may contact Vanguard by phone, by mail, or through our website. See **Contacting Vanguard**.

For Vanguard fund shares held directly with Vanguard, each fund you hold in an account is a separate “fund account.” For example, if you hold three funds in a nonretirement account titled in your own name, two funds in a nonretirement account titled jointly with your spouse, and one fund in an individual retirement account, you have six fund accounts—and this is true even if you hold the same

fund in multiple accounts. Note that each reference to “you” in this Prospectus applies to any one or more registered account owners or persons authorized to transact on your account.

Share Classes and Converting Shares

Share Class Overview

Each Vanguard fund may offer one or more share classes. If a Vanguard fund offers multiple share classes, each share class has the same investment objective, strategies, and policies. However, because different share classes can have different expenses, their investment returns may differ. Vanguard and the Fund have received an exemptive order from the SEC that permits the Fund to offer conventional mutual fund shares and ETF shares. This Prospectus offers the Fund’s conventional mutual fund shares.

The following share classes are offered by the Fund:

- Investor Shares, which are generally available only to Vanguard funds that operate as funds of funds and to certain retirement plan clients that receive recordkeeping services from Vanguard. Other than these eligibility requirements, Investor Shares generally have no investment minimum.
- Admiral Shares, which generally require a minimum initial investment of \$3,000.
- Institutional Shares, which generally require a minimum initial investment of \$5 million.
- Institutional Plus Shares, which generally require a minimum initial investment of \$100 million.
- Institutional Select Shares, which generally require a minimum initial investment of \$3 billion and are generally available only to institutional clients (such as defined contribution or benefit plans, endowments, foundations, and 529 plans).
- ETF Shares, which are an exchange-traded class of shares issued by a fund.

You generally need a minimum of \$1 to add to an existing account.

Additional eligibility requirements other than investment minimums may also apply to each share class. Investment minimums may differ for certain categories of accounts or investors. If you request a certain share class when you open a new account, but the investment amount does not meet the investment minimum for that share class, your investment may be placed in another share class of the Fund, as appropriate. Certain types of accounts may meet the investment minimum for certain share classes by aggregating separate accounts within the same fund.

Vanguard reserves the right, without notice, to change the eligibility requirements of its share classes, including changing the types of clients who are eligible to purchase each share class, increasing or decreasing the minimum amount required to open, convert shares to, or maintain a fund account, or increasing or decreasing the minimum amount required to add to an existing fund account.

Financial intermediaries, institutional clients, and Vanguard-advised clients should contact Vanguard for information on special eligibility rules that may apply to them.

Accounts Held Through Financial Intermediaries. If you hold shares through a financial intermediary (including shares held in a brokerage account through Vanguard Brokerage Services[®]), your financial intermediary may have different policies regarding the availability of certain share classes from those described above. You should consult your financial intermediary to consider your options, including your eligibility for the share classes described above.

Share Class Conversions

When a share class conversion occurs, you receive shares of one share class in place of shares of another class of the same fund. At the time of conversion, the dollar value of the “new” shares you receive equals the dollar value of the “old” shares that were converted. In other words, the conversion has no effect on the total dollar value of your investment in the fund at the time of the conversion. However, the number of shares you own after the conversion may be greater than or less than the number of shares you owned before the conversion, depending on the net asset values (NAVs) of the two share classes. A conversion between share classes of the same fund is a nontaxable event.

Conversions among Conventional Shares. You may be eligible for a self-directed conversion from one conventional (not exchange-traded) share class to another conventional share class (if available) of the Fund if your account meets all eligibility requirements for that share class. If you hold shares directly with Vanguard, you may request a conversion through our website (if you are registered for online access) or by telephone. Your conversion will be executed using the NAVs of the different share classes on the trade date after your conversion request is received in “good order.” For additional information on the requirements of “good order” and how the trade date is determined for a conversion request, please see “*Good Order*” and “*Trade Date*.” Vanguard will not accept your request to cancel any self-directed conversion request once processing has begun.

Mandatory Conversions to Another Share Class. If, for any reason, an account no longer meets the eligibility requirements for a share class, your shares in that account may be automatically converted to a share class for

which the account is eligible. A decline in the account balance because of market movement may result in such a conversion. You will be notified before such mandatory conversion occurs.

Conversions to ETF Shares. Owners of certain conventional shares (i.e., not exchange-traded) issued by a Vanguard fund may be eligible to convert those shares to ETF Shares (if available) of equivalent value of the same fund. Please note that investors who own conventional shares through a 401(k) plan or other employer-sponsored retirement or benefit plan generally may not convert conventional shares to ETF Shares and should check with their plan sponsor or recordkeeper. ETF Shares, whether acquired through a conversion or purchased on the secondary market, cannot be converted to conventional shares by a shareholder. Also, ETF Shares of one fund cannot be exchanged for ETF Shares of another fund.

ETF Shares must be held in a brokerage account. Thus, before converting conventional shares to ETF Shares, you must have an existing, or open a new, brokerage account. This account may be with Vanguard Brokerage Services[®] or with any other brokerage firm.

Vanguard Brokerage Services[®] does not impose a fee on conversions from Vanguard conventional shares to Vanguard ETF Shares. However, other financial intermediaries may charge a fee to process a conversion. Vanguard reserves the right, in the future, to impose a transaction fee on conversions or to limit, temporarily suspend, or terminate the conversion privilege. For additional information on converting conventional shares to ETF Shares, please contact Vanguard to obtain a prospectus for ETF Shares. See **Contacting Vanguard**.

Accounts Held Through Financial Intermediaries. If you hold shares through a financial intermediary (including shares held in a brokerage account through Vanguard Brokerage Services[®]), your financial intermediary may have different rules regarding conversion. You should consult with your financial intermediary to learn about the rules and to determine whether you are eligible to convert your shares.

Pricing of Fund Shares

When you purchase shares, you pay the share price, also known as the NAV, plus any applicable purchase fee. Your shares are also redeemed at the NAV, minus any applicable redemption fee. The share price for your transaction is the next one calculated after your purchase or redemption order is received in good order. NAV is typically calculated as of the close of regular trading on the New York Stock Exchange (“NYSE”), generally 4 p.m., Eastern time, on each day that the NYSE is open for business (a business day). In the rare event the NYSE experiences unanticipated disruptions and is unavailable at the close of

the trading day, NAVs will be calculated as of the close of regular trading on the Nasdaq (or another alternate exchange if the Nasdaq is unavailable, as determined at Vanguard's discretion), generally 4 p.m., Eastern time. The time selected for NAV calculation in this rare event generally shall also serve as the conclusion of the trading day. On U.S. holidays or other days when the NYSE is closed, the NAV is not calculated, and the Vanguard funds do not sell or redeem shares. However, on those days the value of a fund's assets may be affected to the extent that the fund holds securities that change in value on those days (such as foreign securities that trade on foreign markets that are open).

If a fund only has one share class, the NAV per share is computed by dividing the total assets, minus liabilities, of a fund by the number of fund shares outstanding. If a fund has more than one share class, each share class has its own NAV, which is computed by dividing the total assets, minus liabilities, allocated to the share class by the number of fund shares outstanding for that class. The value of securities and other investments held by the Vanguard funds is determined pursuant to the valuation policies and procedures adopted by the Vanguard funds' boards of trustees. Vanguard has been designated as the valuation designee for the Vanguard funds pursuant to Rule 2a-5 under the Investment Company Act of 1940, subject to oversight by the Vanguard funds' boards of trustees.

Securities for which market quotations are readily available are valued at their market value, based on quotations provided by independent third-party pricing sources. Such securities are generally valued at their official closing price, the last reported sales price, or if there were no sales that day, the mean between the closing bid and asking prices, from the principal exchange or market on which they are traded. A fund's investments in any mutual fund shares, including institutional money market fund shares, are valued at the NAVs of the mutual fund shares. A fund's investments in any ETF shares or closed-end fund shares are valued at the market value of those shares.

When the market quotations are not readily available or do not accurately reflect the value of a security or other investment, such security or other investment is priced at fair value, generally based on information provided by independent third-party pricing services, in accordance with the valuation policies and procedures adopted by the Vanguard funds' boards of trustees. Fair value represents a good faith determination of the value of a fund's investments. The fair value of a security or other investment is the amount that the owner might reasonably expect to receive upon the current sale of the security or other investment. Fair-value pricing may require subjective determinations. It is possible that the price determined through fair-value pricing may differ from the price quoted or published by other sources and may not be the price at which those investments could have been sold during the period in which the fair value was used.

Fair-value pricing may be used in a variety of circumstances. For example, it may be used if the value of a security or other investment has been materially affected by events occurring after the close of the principal exchange or market on which the security is traded but before the funds' NAV is calculated. These events might be company-specific (e.g., earnings report, merger announcement), country-specific (e.g., significant price movements in U.S. or a foreign market), or regional/global events (e.g., natural disaster, economic or political news, interest rate change, act of terrorism). These events could affect a single security or a large number of securities in a particular market, and it most commonly occurs with foreign portfolio holdings because many foreign markets operate at times that do not coincide with those of the major U.S. markets. Events that could affect the value of the foreign portfolio holdings may occur between the close of the foreign market and the time a fund's NAV is calculated. The values of any foreign securities held by a fund are converted into U.S. dollars using an exchange rate obtained from an independent third party as of the close of regular trading on the NYSE.

In addition, fair-value pricing may be used if trading in a security is halted and does not resume before a fund's pricing time, a security does not trade in the course of a day and a fund holds enough of the security that its price could affect the NAV, or if the trading market on which a security is listed is suspended or closed and no appropriate alternative trading market is available.

Fixed income securities are generally valued based on information furnished by independent pricing services and are priced at fair value. Pricing services may use matrix pricing or valuation models that utilize certain inputs and assumptions to derive values. Pricing services generally value fixed income securities assuming orderly transactions of an institutional round lot size, but a fund may hold or transact in such securities in smaller odd lot sizes. Odd lots may trade at lower prices than institutional round lots.

Failures by third-party pricing services to carry out their obligations to the Vanguard funds (e.g., any errors in the data provided by third-party pricing services) could result in delays in the calculation of the funds' NAVs and/or the inability to calculate the NAVs over extended time periods. The funds may be unable to recover any losses associated with such failures.

Vanguard fund share prices are published daily on our website.

Purchase, Redemption, and Exchange of Fund Shares

How to Purchase, Redeem, and Exchange Shares

If you hold Vanguard fund shares through a financial intermediary (including shares held in a brokerage account through Vanguard Brokerage Services[®]), you should contact your financial intermediary to purchase, redeem, or exchange shares. Depending on the policies and procedures of your financial

intermediary, the procedures and rules by which you open an account and/or purchase, redeem, and exchange shares may differ from the procedures and rules discussed below.

If you hold shares directly with Vanguard, please see the information below regarding purchasing, redeeming, and exchanging your shares.

How to Initiate a Purchase, Redemption, or Exchange Request

- **Online or by telephone.** You may open certain types of accounts, request a purchase, redemption, or exchange of your shares online through our website (if you are registered for online access), or by calling Vanguard. See **Contacting Vanguard**.
- **By Mail.** You may also send Vanguard your account registration form and check to open certain types of accounts. To add to an existing account, you may send your check with a purchase form. You may also send a form (available online) to Vanguard by mail to redeem from a fund account.

How to Pay for a Purchase

- **By electronic bank transfer.** You may purchase shares of a Vanguard fund through an electronic transfer of money from a bank account. To establish the electronic bank transfer service on a Vanguard account, you must designate the bank account online, complete a form, or fill out the appropriate section of your account registration form. After the service is set up on your account, you can purchase shares by electronic bank transfer on a regular schedule (Automatic Investment Plan), if eligible, or upon request.
- **By wire.** Wiring instructions vary for different types of purchases. Please call Vanguard for instructions and policies on purchasing shares by wire. See **Contacting Vanguard**.
- **By check.** You may make initial or additional purchases to your fund account by sending a check with a purchase form. Make your check payable to Vanguard and include the appropriate fund number (e.g., Vanguard—XX). For a list of Fund numbers (for share classes in this Prospectus), see **Additional Information**. All purchase checks must be written in U.S. dollars, drawn on a U.S. bank, and accompanied by good order instructions. Vanguard does not accept cash, traveler's checks, starter checks, or money orders. In addition, Vanguard may refuse checks that are not made payable to Vanguard.
- **By exchange.** You may purchase shares of a Vanguard fund using the proceeds from the simultaneous redemption of shares of another Vanguard fund.

How to Receive Redemption Proceeds

- **By electronic bank transfer.** You may have the proceeds of a fund redemption sent directly to a designated bank account. To establish the electronic bank transfer service on a Vanguard account, you must designate a bank account online, complete a form, or fill out the appropriate section of your account registration form. After the service is set up on your account, you can redeem shares by electronic bank transfer on a regular schedule (Automatic Withdrawal Plan), if eligible, or upon request.
- **By wire.** To receive your proceeds by wire, you may instruct Vanguard to wire your redemption proceeds (\$100 minimum) to a previously designated bank account. To establish the wire redemption service, you generally must designate a bank account online, complete a form, or fill out the appropriate section of your account registration form.
- **By exchange.** You may have the proceeds of a Vanguard fund redemption invested directly in shares of another Vanguard fund.
- **By check.** You may have the proceeds of a fund redemption sent via check directly to you at the mailing address you have on file.

At your request, we can make your redemption check payable, or wire your redemption proceeds, to a different person or send it to a different address. However, this generally requires the written consent of all registered account owners and may require additional documentation, such as a signature guarantee or a notarized signature. You may obtain a signature guarantee from some commercial or savings banks, credit unions, trust companies, or member firms of a U.S. stock exchange.

Other Rules You Should Know

Responsibility for Fraud. You should take precautions to protect yourself from fraud. Keep your account-related information private, and review any account confirmations, statements, or other information that we provide to you as soon as you receive them. Let us know immediately if you discover unauthorized activity or see something on your account that you do not understand or that looks unusual. Vanguard will not be responsible for losses that result from transactions by a person who we reasonably believe is authorized to act on your account.

Account Service Fee. Vanguard may charge a \$25 account service fee on fund accounts that have a balance below \$5,000,000 for any reason, including market fluctuation. The account service fee may be applied to both retirement and nonretirement fund accounts and may be assessed on fund accounts in all Vanguard funds, regardless of the account minimum. The fee, which will be collected by redeeming fund shares in the amount of \$25, will be deducted from fund accounts subject to the fee once per calendar year. Certain account types have alternative fee structures, including SIMPLE IRAs, Vanguard Retirement Investment Program pooled plans, and Vanguard Individual 401(k) Plans.

Wire Fee. Please note that Vanguard charges a \$10 wire fee for outgoing wire redemptions. The fee is assessed in addition to, rather than being withheld from, redemption proceeds and is paid directly to the fund in which you invest. For example, if you redeem \$100 via a wire, you will receive the full \$100, and the \$10 fee will be assessed to your fund account through an additional redemption of fund shares. If you redeem your entire fund account, your redemption proceeds will be reduced by the amount of the fee. The wire fee may not apply to certain types of accounts, please call or visit our website for more information on how the wire fee is charged.

No Cancellation. Vanguard will not accept your request to cancel any purchase, redemption or exchange request once processing has begun, so please be careful when placing a transaction request.

New Accounts. We are required by law to obtain from you certain personal information that we will use to verify your identity. If you do not provide the information, we may not be able to open your account. If we are unable to verify your identity, Vanguard reserves the right, without notice, to close your account or take such other steps as we deem reasonable. Certain types of accounts may require additional documentation.

Vanguard.com Registration. If you are a registered user of *vanguard.com*, you can review your account holdings; purchase, redeem, or exchange shares of most Vanguard funds; and perform most other transactions through our website. You must register for this service online.

Proof of a Caller's Authority. We reserve the right to refuse a telephone request if the caller is unable to provide the requested information or if we reasonably believe that the caller is not an individual authorized to act on the account. Before we allow a caller to act on an account, we may request the following information:

- Authorization to act on the account (as the account owner or by legal documentation or other means).
- Account registration and address.
- Fund name and account number, if applicable.
- Other information relating to the caller, the account owner, or the account.

Unusual Circumstances. If you experience difficulty contacting Vanguard online or by telephone, you can send us your transaction request on a Vanguard form by regular or express mail.

Documentation for Certain Accounts. Special documentation may be required to redeem from certain types of accounts, such as trust, corporate, nonprofit, or retirement accounts. Please call us before attempting to redeem from these types of accounts.

Recently Purchased Shares. Although you can redeem shares at any time, proceeds may not be made available to you until the fund collects payment for your purchase. This may take up to seven calendar days for shares purchased by check or by electronic bank transfer. If you have written a check on a fund in an account with checkwriting privileges, that check may be rejected if your fund account does not have a sufficient available balance.

Address Change. If you change your address online or by telephone, there may be up to a 14-day restriction (starting on the business day after your address is changed) on your ability to request check redemptions online and by telephone. You can request a redemption in writing (using a form available online) at any time. Confirmations of address changes are sent to both the old and new addresses.

Future Trade-Date Requests. Vanguard does not accept requests to hold a purchase, conversion, redemption, or exchange transaction for a future date. All such requests will receive trade dates as described in *Trade Date*. Vanguard reserves the right to return future-dated purchase checks.

Uncashed Checks. Please cash your distribution or redemption checks promptly. Vanguard will not pay interest on uncashed checks. Vanguard may be required to transfer assets related to uncashed checks to a state under the state's abandoned property law.

Invalid Addresses. If a dividend distribution or capital gains distribution check mailed to your address of record is returned as undeliverable, Vanguard will automatically reinvest the distribution and all future distributions back to the fund from which the distribution occurred until you provide us with a valid mailing address. Reinvestments will receive the NAV calculated on the date of the reinvestment.

Dormant Accounts. If your account has no activity in it for a period of time, Vanguard may be required to transfer it to a state under the state's abandoned property law, subject to potential federal or state withholding taxes.

Accounts with More than One Owner. If an account has more than one owner or authorized person, Vanguard generally will accept instructions from any one owner or authorized person.

Share Certificates. Share certificates are no longer issued for Vanguard funds. Shares currently held in certificates cannot be redeemed, exchanged, converted, or transferred (reregistered) until you return the certificates (unsigned) to Vanguard by registered mail.

Additional Information Regarding Redemption of Shares

Methods Used to Meet Redemption Requests. Under normal circumstances, the Vanguard funds typically expect to meet redemptions with positive cash flows. When this is not an option, a fund seeks to maintain its risk exposure by

selling a cross section of the fund's holdings to meet redemptions, while also factoring in transaction costs. Additionally, a fund may work with larger clients to implement their redemptions in a manner that is least disruptive to the portfolio.

Under certain circumstances, including under stressed market conditions, there are additional tools that a fund may use in order to meet redemptions, including advancing the settlement of market trades with counterparties to match investor redemption payments or delaying settlement of an investor's transaction to match trade settlement within regulatory requirements. A fund may also suspend payment of redemption proceeds for up to seven days. Additionally under these unusual circumstances, a fund may borrow money (subject to certain regulatory conditions and if available under board-approved procedures) through an interfund lending facility; through a bank line-of-credit, including a joint committed credit facility; or through an uncommitted line-of-credit from Vanguard in order to meet redemption requests.

Although the Vanguard funds typically intend to meet redemption requests in cash, in consideration of the best interests of the funds and their remaining shareholders, the funds reserve the right to pay redemption proceeds wholly or partly in-kind by delivering readily marketable securities held by the funds in lieu of cash in conformity with applicable rules of the SEC and in accordance with procedures adopted by the funds' board of trustees. Redemptions in-kind may be used during both normal and stressed market conditions. For example, a fund may make a redemption in-kind if a cash redemption could negatively affect its operations or performance, as may be the case with large redemption amounts, or in situations where the redeeming shareholder may be engaged in market timing or frequent trading. A fund may delay payment of the redemption proceeds for up to seven calendar days.

Please contact Vanguard before you attempt to redeem a large dollar amount. In doing so, you may avoid in-kind or delayed payment of your redemption.

Emergency Circumstances. The Vanguard funds can postpone payment of redemption proceeds for up to seven calendar days. In addition, the Vanguard funds can suspend redemptions and/or postpone payments of redemption proceeds beyond seven calendar days at times when the NYSE is closed or during emergency circumstances or such other periods, as determined by the SEC.

Timing of Payment of Redemption Proceeds. If your redemption request is received in good order, we typically expect that redemption proceeds will be paid by the Vanguard fund within one business day of the trade date; however, in certain circumstances, investors may experience a longer settlement period at the time of the transaction. Please see *Methods Used to Meet Redemption Requests* and *Emergency Circumstances* for further information.

If you hold shares directly with Vanguard, the following rules also apply:

- Timing of wire redemptions from money market funds: for telephone requests received by Vanguard on a business day before 10:45 a.m., Eastern time (2 p.m., Eastern time, for Vanguard Cash Reserves Federal Money Market Fund; 12:30 p.m., Eastern time, for Vanguard Federal Money Market Fund), the redemption proceeds generally will leave Vanguard by the close of business the same day. For telephone requests received by Vanguard on a business day after those cut-off times, or on a nonbusiness day, and for all requests other than by telephone, the redemption proceeds generally will leave Vanguard by the close of business on the next business day.
- Timing of wire redemptions from all other funds: for requests received by Vanguard on a business day before the close of regular trading on the NYSE (generally 4 p.m., Eastern time), the redemption proceeds generally will leave Vanguard by the close of business on the next business day. For requests received by Vanguard on a business day after the close of regular trading on the NYSE, or on a nonbusiness day, the redemption proceeds generally will leave Vanguard by the close of business on the second business day after Vanguard receives the request.
- If your redemption request is not in good order, it may be rejected. If we are unable to send your redemption proceeds by wire or electronic bank transfer because the receiving institution rejects the transfer, Vanguard will make additional efforts to complete your transaction. If Vanguard is still unable to complete the transaction, we may send the proceeds of the redemption to you by check, generally payable to all registered account owners, or use your proceeds to purchase new shares of the fund from which you sold shares for the purpose of the wire or electronic bank transfer transaction.

Good Order

Vanguard funds reserve the right to reject any transaction instructions that are not in “good order.” Good order generally means that your instructions:

- Are provided by the person(s) authorized in accordance with Vanguard’s policies and procedures to access the account and request transactions.
- Include the fund name and account number.
- Include the amount of the transaction (stated in dollars, shares, or percentage).

Written instructions also must generally be provided on a Vanguard form and include:

- Signature(s) and date from the authorized person(s).
- Signature guarantees or notarized signatures, if required for the type of transaction. (Call Vanguard for specific requirements.)

- Any supporting documentation that may be required.

Good order requirements may vary among different types of accounts and transactions. Vanguard reserves the right, without notice, to revise the requirements for good order. If you hold shares through a financial intermediary (including shares held in a brokerage account through Vanguard Brokerage Services[®]), please contact your financial intermediary for more details on good order requirements that may apply to you.

Trade Date

If you place your purchase, redemption, or exchange order through a financial intermediary (including through a brokerage account held at Vanguard Brokerage Services[®]), it is their responsibility to send your order to the Vanguard funds. Your transaction will be executed using the NAV next calculated after the order is received by the Vanguard funds in good order.

The Vanguard funds have authorized certain financial intermediaries and their designees, and may, from time to time, authorize certain funds of funds for which Vanguard serves as the investment advisor (Vanguard Funds of Funds), to accept orders to purchase or redeem fund shares on behalf of the Vanguard funds. In these circumstances, the Vanguard fund will be deemed to receive an order when accepted by the authorized financial intermediary, its designee, or one of the Vanguard Funds of Funds, and the order will be executed using the NAV next calculated after such acceptance.

If you hold shares directly with Vanguard, you may place your transaction request directly with Vanguard. Your transaction request will be executed using the NAV as calculated on the trade date as determined below. The trade date for any transaction request received in good order will depend on the day and time Vanguard receives your request, the manner in which you are transacting, and the type of fund in which you are transacting. If your transaction request is not in good order, it may be rejected.

Trade Date for a Purchase Order. For purchases by check into all funds other than money market funds and for purchases by exchange, wire, or electronic bank transfer into all funds: If the purchase request is received by Vanguard on a business day before the close of regular trading on the NYSE (generally 4 p.m., Eastern time), the trade date for the purchase will be the same day. If the purchase request is received on a business day after the close of regular trading on the NYSE, or on a nonbusiness day, the trade date for the purchase will be the next business day.

For purchases by check into money market funds: If the purchase request is received by Vanguard on a business day before the close of regular trading on the NYSE (generally 4 p.m., Eastern time), the trade date for the purchase will be the next business day. If the purchase request is received on a business day after the close of regular trading on the NYSE, or on a nonbusiness day, the

trade date for the purchase will be the second business day following the day Vanguard receives the purchase request. Because money market instruments must be purchased with federal funds and it takes a money market mutual fund one business day to convert check proceeds into federal funds, the trade date for the purchase will be one business day later than for other funds.

Trade Date for a Redemption, Exchange, or Conversion Order (other than an order to convert to ETF Shares (if available)). If the transaction is received in good order on a business day before the close of regular trading on the NYSE (generally 4 p.m., Eastern time), the trade date will generally be the same day. If the transaction is received in good order on a business day after the close of regular trading on the NYSE, or on a nonbusiness day, the trade date will generally be the next business day.

Investing in Vanguard Funds through Employer-Sponsored Plans

If Vanguard fund shares are an investment option in your employer-sponsored retirement or savings plan, your plan administrator or your employee benefits office can provide you with detailed information on how to participate in your plan and how to elect a fund as an investment option.

Processing times for your transaction requests may differ among recordkeepers or among transaction and funding types. Your plan's recordkeeper (which may also be Vanguard) will determine the necessary processing time frames for your transaction requests prior to submission to a fund. Consult your recordkeeper or plan administrator for more information.

If Vanguard is serving as your plan recordkeeper and if your transaction involves one or more investments with an early cut-off time for processing or another trading restriction, your entire transaction will be subject to the restriction when the trade date for your transaction is determined.

If you have questions about your account, contact your plan administrator or the organization that provides recordkeeping services for your plan. If you have any questions about the Vanguard funds or Vanguard, including those about a fund's investment objective, strategies, or risks, contact Vanguard Participant Services toll-free at 800-523-1188 or visit our website at vanguard.com. Vanguard reserves the right to change its policies without notice to shareholders.

Shareholder Documents

When two or more shareholders have the same last name and address, just one summary prospectus (or prospectus) and/or shareholder report may be sent in an attempt to eliminate the unnecessary expense of duplicate mailings. You may request individual prospectuses and reports by contacting our Client Services Department in writing, by telephone, or online. See **Contacting Vanguard**.

Confirmation Statements. If you hold shares directly with Vanguard, we will send (or provide through our website, whichever you prefer) a confirmation of your trade date and the amount of your transaction when you purchase, redeem, exchange, or convert shares. However, we will not send confirmations reflecting only checkwriting redemptions or the reinvestment of dividend or capital gains distributions. For any month in which you had a checkwriting redemption, a Checkwriting Activity Statement will be sent to you itemizing the checkwriting redemptions for that month. Promptly review each confirmation statement that we provide to you. It is important that you contact Vanguard immediately with any questions you may have about any transaction reflected on a confirmation statement, or Vanguard will consider the transaction properly processed.

If you hold shares through a financial intermediary (including shares held in a brokerage account through Vanguard Brokerage Services®), your financial intermediary will provide you with confirmation statements. Please contact your financial intermediary for details.

Portfolio Summaries. If you hold shares directly with Vanguard, we will send (or provide through our website, whichever you prefer) quarterly portfolio summaries to help you keep track of your accounts throughout the year. Each summary shows the market value of your account at the close of the statement period, as well as all distributions, purchases, redemptions, exchanges, transfers, and conversions for the current calendar quarter (or month). Promptly review each summary that we provide to you. It is important that you contact Vanguard immediately with any questions you may have about any transaction reflected on the summary, or Vanguard will consider the transaction properly processed.

Tax Information Statements. For most accounts, Vanguard (or your financial intermediary) is required to provide annual tax forms to assist you in preparing your income tax returns. These forms are generally available for each calendar year early in the following year. Registered users of *vanguard.com* can also view certain forms through our website. Vanguard (or your financial intermediary) may also provide you with additional tax-related documentation. For more information, consult our website at *vanguard.com* or see **Contacting Vanguard**.

Shareholder Reports and Financial Statements. Additional information about the Fund's investments and performance is available in the Fund's Annual and Semi-Annual Reports. The Fund's financial statements are filed with the SEC on Form N-CSR and available on our website.

Electronic Delivery. Vanguard can deliver your account statements, transaction confirmations, prospectuses, certain tax forms, and shareholder reports electronically. If you are a registered user of *vanguard.com*, you can consent to the electronic delivery of these documents by logging on and

changing your mailing preferences. You can revoke your electronic consent at any time through our website, and we will begin to send paper copies of these documents within 30 days of receiving your revocation.

If you hold shares through a financial intermediary (including shares held in a brokerage account through Vanguard Brokerage Services®), please contact your financial intermediary for electronic access to shareholder documents. Some financial intermediaries may not offer this service.

Reservation of Rights

In addition to the rights expressly stated elsewhere in this Prospectus, Vanguard reserves the following rights:

Right to Change Policies. Vanguard reserves the right, without notice, to (1) alter, add, or discontinue any conditions of purchase (including eligibility requirements), redemption, exchange, conversion, service, or privilege at any time and (2) alter, impose, discontinue, or waive any purchase fee, redemption fee, account service fee, or other fee charged to a shareholder or a group of shareholders. Changes may affect any or all investors. These actions will be taken when, at the sole discretion of Vanguard management, Vanguard believes they are in the best interest of a fund.

Account Restrictions. Vanguard reserves the right to: (1) redeem all or a portion of a fund/account to meet a legal obligation, including tax withholding, tax lien, garnishment order, or other obligation imposed on your account by a court or government agency; (2) redeem shares, close an account, or suspend account privileges, features, or options in the case of threatening conduct or activity; (3) redeem shares, close an account, or suspend account privileges, features, or options if Vanguard believes or suspects that not doing so could result in a suspicious, fraudulent, or illegal transaction; (4) place restrictions on the ability to redeem any or all shares in an account if it is required to do so by a court or government agency; (5) place restrictions on the ability to redeem any or all shares in an account if Vanguard believes that doing so will prevent fraud, financial exploitation or abuse, or to protect vulnerable investors when permitted by applicable law, regulations, or SEC guidance; (6) freeze any account and/or suspend account services if Vanguard has received reasonable notice of a dispute regarding the assets in an account, including notice of a dispute between the registered or beneficial account owners; and (7) freeze any account and/or suspend account services upon initial notification to Vanguard of the death of an account owner.

Right to Refuse or Reject Purchase Requests. Vanguard reserves the right to stop selling fund shares or to reject any purchase request at any time and without notice, including, but not limited to, purchases requested by exchange from another Vanguard fund. This also includes the right to reject any purchase

request because the investor has a history of frequent trading or because the purchase may negatively affect a fund's operation or performance (as may be the case with large purchase amounts).

Please contact Vanguard before you attempt to invest a large dollar amount. In doing so, you may avoid delayed or rejected transactions.

Exchange Privilege. Vanguard reserves the right, without notice, to revise or terminate the exchange privilege, limit the amount of any exchange, or reject an exchange, at any time, for any reason.

Please contact Vanguard before you attempt to exchange a large dollar amount. In doing so, you may avoid delayed or rejected transactions.

Account Liquidation. If an account no longer meets the eligibility requirements for a share class, a fund may, subject to applicable law, liquidate such fund account. Accounts with balances below the minimum amount required to maintain eligibility may be subject to liquidation, including when the decline results from market fluctuations or any other reason. This liquidation policy applies to nonretirement fund accounts and accounts that are held through financial intermediaries. You will be notified before a liquidation occurs.

Dividends, Distributions, and Taxes

Fund Distributions

The Fund generally distributes to shareholders virtually all of its net income (interest and dividends, less expenses) as well as any net short-term or long-term capital gains realized from the sale of its holdings. The Fund may also make distributions that are treated as a return of capital. Income dividends generally are distributed quarterly in March, June, September, and December. Capital gains distributions, if any, generally occur annually in December. In addition, the Fund may make a supplemental distribution at some other time during the year.

From time to time, Vanguard and/or a fund's board of trustees may adjust a fund's fees and expenses and/or reduce, refund, reimburse, waive, or otherwise return to the funds and their shareholders a portion of prior fees and expenses (collectively, "expense adjustments"). Fund performance and potentially shareholder distributions, will reflect such expense adjustments. If you sell all or part of your investment in a fund before an expense adjustment occurs, then you will not receive the economic benefit, if any, of such expense adjustment. An expense adjustment at any given time does not imply or guarantee that similar or additional expense adjustments will be made in the future.

You can receive distributions of income or capital gains in cash, or you can have them automatically reinvested in more shares of the Fund. However, if you are investing through an employer-sponsored retirement or savings plan, your distributions will be automatically reinvested in additional Fund shares.

From time to time, the Fund may pay out higher-than-expected distributions. As an index fund, the Fund must adjust its holdings to reflect changes in its target index. In some cases, such changes may force an index fund to sell securities that have appreciated in value, thereby realizing a capital gain that must be distributed to shareholders. A security may move out of an index for a number of reasons, including a merger or acquisition, a substantial change in the market capitalization of the issuer, or the movement of a country from emerging market to developed market status.

Basic Tax Points

Investors in taxable accounts should be aware of the following basic federal income tax points:

- Distributions are taxable to you whether or not you reinvest these amounts in additional Fund shares.
- Distributions declared and recorded in December—if paid to you by the end of January—are generally taxable as if received in December.
- Any dividend distribution or short-term capital gains distribution that you receive is taxable to you as ordinary income. If you are an individual and meet certain holding-period requirements with respect to your Fund shares, you may be eligible for reduced tax rates on “qualified dividend income,” if any, or a special tax deduction on “qualified REIT dividends,” if any, distributed by the Fund.
- Any distribution of net long-term capital gains is taxable to you as long-term capital gains, no matter how long you have owned shares of the Fund.
- Capital gains distributions can occur when the Fund sells assets at a gain. Capital gains distributions vary from year to year as a result of the Fund’s investment activities and cash flows, including those due to redemption activity by Fund shareholders.
- Capital gains distributions may occur if Vanguard, the Fund, or its advisor make changes that would impact the Fund directly or indirectly, including changes to the Fund’s portfolio or advisors or changes to any other Vanguard fund or product that would involve the redemption of shares of the Fund and the related sale of the Fund’s investments. Such changes could, depending on the timing, result in capital gains distributions in the current fiscal year, subsequent fiscal year, or both.
- Your cost basis in the Fund will be decreased by the amount of any return of capital that you receive. This, in turn, will affect the amount of any capital gain or loss that you realize when selling or exchanging your Fund shares.

- Return of capital distributions generally are not taxable to you until your cost basis has been reduced to zero. If your cost basis is at zero, return of capital distributions will be treated as capital gains.
- A sale or exchange of Fund shares is a taxable event. This means that you may have a capital gain to report as income, or a capital loss to report as a deduction, when you complete your tax return.
- Any conversion between classes of shares of the *same* fund is a *nontaxable* event. By contrast, an exchange between classes of shares of *different* funds is a *taxable* event.
- Vanguard (or your intermediary) will send you a statement each year showing the tax status of all of your distributions.
- If you purchase shares before an ex-dividend date when a fund has realized but not yet distributed income or capital gains, the purchase price may include the amount of the upcoming distribution, and you may pay the full price for the shares and later receive a portion of the purchase price back as a taxable distribution. In such case, you generally will be taxed upon receipt of such distribution, even though the distribution effectively represents a return of a portion of your purchase price. This is known as “buying a dividend.”

Individuals, trusts, and estates whose income exceeds certain threshold amounts are subject to a 3.8% Medicare contribution tax on “net investment income.” Net investment income takes into account distributions paid by the Fund and capital gains from any sale or exchange of Fund shares.

Dividend distributions and capital gains distributions that you receive, as well as your gains or losses from any sale or exchange of Fund shares, may be subject to state and local income taxes.

The Fund may be subject to foreign taxes or foreign tax withholding on dividends, interest, and capital gains from foreign securities. If, at the end of the taxable year, more than 50% of the value of the Fund’s assets consists of securities of foreign corporations, and the Fund makes a special election, you will generally be required to include in your income, for U.S. federal income tax purposes, your share of the qualifying foreign income taxes paid by the Fund in respect of its foreign portfolio securities. There is no assurance that the Fund will make this election for a taxable year, even if it is eligible to do so. You may qualify for an offsetting credit or deduction under U.S. tax laws for any amount designated as your portion of the Fund’s foreign tax obligations, provided that you meet certain requirements. See your tax advisor or IRS publications for more information.

This Prospectus provides general tax information only. If you are investing through a tax-advantaged account, such as an IRA or an employer-sponsored retirement or savings plan, special tax rules apply. Please consult your own tax advisor for detailed information about any tax consequences for you.

General Information

Backup Withholding. By law, Vanguard must withhold 24% of any taxable distributions or redemptions from your account if you do not:

- Provide your correct taxpayer identification number.
- Certify that the taxpayer identification number is correct.
- Confirm that you are not subject to backup withholding.

Similarly, Vanguard (or your intermediary) must withhold taxes from your account if the IRS instructs us to do so.

Special Notice to Non-U.S. Investors. The Fund offered for sale in this Prospectus is primarily intended to be made available to U.S. residents and may not be appropriate for investors taxable outside of the United States. Non-U.S. investors should visit the non-U.S. investors page on our website at global.vanguard.com for information about Vanguard's non-U.S. products.

Non-U.S. investors should be aware that U.S. withholding and estate taxes and certain U.S. tax reporting requirements under the Internal Revenue Code, as well as any non-U.S. taxes imposed by the investor's relevant tax jurisdiction, may apply to an investment in the Fund. Non-U.S. investors should consult their own tax advisors with respect to any particular U.S. or non-U.S. tax consequences of their investment in the Fund.

Frequent Trading Limitations

Overview

Some investors may try to profit from strategies involving frequent trading of mutual fund shares (such as market-timing) and other excessive trading practices (together, "frequent trading"). For funds holding foreign securities, investors may try to take advantage of an anticipated difference between the price of the fund's shares and price movements in overseas markets because of different closing times of U.S. and non-U.S. markets, a practice also known as time-zone arbitrage. Some investors may also try to engage in frequent trading of funds holding investments in small-cap stocks and high-yield bonds that are thinly traded. Frequent trading may disrupt portfolio management strategies and increase a fund's costs (such as increased brokerage and administrative costs) for all shareholders including the long-term investors.

Each Vanguard fund (other than money market funds and short-term bond funds, but including Vanguard Short-Term Inflation-Protected Securities Index Fund) limits frequent trading. The Board has adopted policies and procedures reasonably designed to detect and discourage frequent trading. Although there is no assurance that Vanguard will be able to detect or prevent frequent trading in all circumstances, the policies and procedures discussed below have been adopted to address these issues.

Each Vanguard fund reserves the right to reject any purchase request—including exchanges from other Vanguard funds—without notice and regardless of size. For example, a purchase request could be rejected because the investor has a history of frequent trading or if Vanguard determines that such purchase may negatively affect a fund's operation or performance. Certain Vanguard funds charge shareholders purchase and/or redemption fees on transactions. Each Vanguard fund (other than retail and government money market funds), in determining its net asset value, will use fair-value pricing when appropriate, as described in *Pricing of Fund Shares*. Fair-value pricing may reduce or eliminate the profitability of certain frequent trading strategies.

Frequent Trading Policy

Each Vanguard fund (other than money market funds and short-term bond funds, but including Vanguard Short-Term Inflation-Protected Securities Index Fund) limits an investor's purchases or exchanges into a fund account for 30 calendar days after the investor has redeemed or exchanged out of that fund account ("Frequent-Trading Limits"). ETF shares are not subject to these Frequent-Trading Limits. For Vanguard Retirement Investment Program pooled plans, the Frequent-Trading Limits apply to exchanges made online or by telephone.

The Frequent-Trading Limits do not apply to the following:

- Purchases of shares with reinvested dividend or capital gains distributions.
- Transactions through Vanguard's Automatic Investment Plan, Automatic Exchange Service, Direct Deposit Service, Automatic Withdrawal Plan, Required Minimum Distribution Service, Vanguard Small Business Online[®], and certain transactions through intermediaries relating to systematic trades and required minimum distributions.
- Discretionary transactions through Vanguard Personal Advisor Services[®], Vanguard Digital Advisor[™], and discretionary (advisor-directed) transactions through certain intermediaries.
- Redemptions of shares to pay fund or account fees.
- Redemptions of shares to remove excess shareholder contributions to certain types of retirement accounts (including, but not limited to, IRAs, certain Individual 403(b)(7) Custodial Accounts, and Vanguard Individual 401(k) Plans).
- Transfers and reregistrations of shares within the same fund.
- Purchases of shares by asset transfer or direct rollover.
- Conversions of shares from one share class to another in the same fund.
- Checkwriting redemptions.
- Section 529 college savings plans.

- Certain approved institutional portfolios and asset allocation programs, as well as trades made by funds or trusts managed by Vanguard or its affiliates that invest in other Vanguard funds. (Please note that shareholders of Vanguard's funds of funds are subject to the limitations.)
- Certain transactions below dollar value or other thresholds specified by Vanguard.
- In-kind transfers to a shareholder's donor advised fund managed by Vanguard Charitable.

For participants in employer-sponsored defined contribution plans,* the Frequent-Trading Limits do not apply to:

- Purchases of shares with participant payroll or employer contributions or loan repayments.
- Purchases of shares with reinvested dividend or capital gains distributions.
- Distributions, loans, and in-service withdrawals from a plan.
- Redemptions of shares as part of a plan termination or at the direction of the plan.
- Transactions executed through the Vanguard Managed Account Program.
- Redemptions of shares to pay fund or account fees.
- Share or asset transfers or rollovers.
- Reregistrations of shares.
- Conversions of shares from one share class to another in the same fund.
- Exchange requests submitted by written request to Vanguard. (Exchange requests submitted by fax, if otherwise permitted, are subject to the limitations.)

*The following Vanguard fund accounts are also subject to the Frequent-Trading Limits: SEP-IRAs, SIMPLE IRAs, certain Individual 403(b)(7) Custodial Accounts, and Vanguard Individual 401(k) Plans.

Accounts Held by Institutions (Other Than Defined Contribution Plans).

Vanguard will systematically monitor for frequent trading in institutional clients' accounts. If we detect suspicious trading activity, we will investigate and take appropriate action, which may include applying to a client's accounts the 30-day policy previously described, prohibiting a client's purchases of fund shares, and/or revoking the client's exchange privilege.

Accounts Held by Intermediaries. When intermediaries establish accounts in Vanguard funds for the benefit of their clients, we cannot always monitor the trading activity of the individual clients. However, we review trading activity at the intermediary (omnibus) level, and if we detect suspicious activity, we will investigate and take appropriate action. If necessary, Vanguard may prohibit additional purchases of fund shares by an intermediary, including for the benefit

of certain of the intermediary's clients. Intermediaries also may monitor their clients' trading activities with respect to Vanguard funds.

For those Vanguard funds that charge purchase and/or redemption fees, intermediaries will be asked to assess these fees on client accounts and remit these fees to the funds. The application of purchase and redemption fees and Frequent-Trading Limits may vary among intermediaries. There are no assurances that Vanguard will successfully identify all intermediaries or that intermediaries will properly assess purchase and redemption fees or administer Frequent-Trading Limits. If you invest with Vanguard through an intermediary, please read that firm's materials carefully to learn of any other rules or fees that may apply.

Do not invest with Vanguard if you are a market-timer.

Financial Highlights

Financial highlights information is intended to help you understand a fund's performance for the past five years (or, if shorter, its period of operations). Certain information reflects financial results for a single fund share. Total return represents the rate that an investor would have earned or lost each period on an investment in a fund or share class (assuming reinvestment of all distributions). This information has been obtained from the financial statements audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, whose report, along with fund financial statements, is included in a fund's most recent annual Financial Statements and Other Information. You may obtain a free copy of a fund's latest disclosure documents upon request.

Ratio of Total Expenses to Average Net Assets	0.10%	0.11% ³	0.12% ³	0.11% ³	0.11%
Ratio of Net Investment Income to Average Net Assets	2.83%	2.83%	3.02%	3.11%	2.55%
Portfolio Turnover Rate ⁴	4%	3%	4%	5%	8%

1 Calculated based on average shares outstanding.

2 Total returns do not include account service fees that may have applied in the periods shown. Fund prospectuses provide information about any applicable account service fees.

3 The ratio of expenses to average net assets for the period net of reduction from custody fee offset arrangements was 0.11%, 0.12% and 0.11%, respectively.

4 Excludes the value of portfolio securities received or delivered as a result of in-kind purchases or redemptions of the fund's capital shares, including ETF Creation Units.

Additional Information

A Precautionary Note to Investment Companies. The Fund's shares are issued by a registered investment company, and therefore the acquisition of such shares by other investment companies and private funds is subject to the restrictions of Section 12(d)(1) of the Investment Company Act of 1940 (the 1940 Act). SEC Rule 12d1-4 under the 1940 Act permits registered investment companies to invest in other registered investment companies beyond the limits in Section 12(d)(1), subject to certain conditions, including that funds with different investment advisors must enter into a fund of funds investment agreement.

Forum Selection. The Trust's Bylaws designate Delaware courts as the exclusive forum for certain claims against or related to the Trust, a trustee, an officer, or other employee of the Trust, except that, unless the Trust otherwise consents in writing, the U.S. Federal District Courts are the exclusive forum for the resolution of complaints under the Securities Act of 1933 or the 1940 Act. These provisions may limit a shareholder's ability to bring a claim in a different forum and may result in increased shareholder costs in pursuing such a claim.

Shareholder Rights. The Trust's Agreement and Declaration of Trust, as amended, requires a shareholder bringing a derivative action on behalf of the Trust that is subject to a pre-suit demand to collectively hold at least 10% of the outstanding shares of the Trust or at least 10% of the outstanding shares of the series or class to which the demand relates and to undertake to reimburse the Trust for the expense of any counsel or advisors used when considering the merits of the demand in the event that the board of trustees determines not to bring such action. In each case, these requirements do not apply to claims arising under the federal securities laws to the extent that any such federal securities laws, rules, or regulations do not permit such application. The Trust's Bylaws also provide that shareholders waive the right to trial by jury to the fullest extent permitted by law.

Joint Committed Credit Facility. The Fund participates, along with other funds managed by Vanguard, in a committed credit facility provided by a syndicate of lenders pursuant to a credit agreement that may be renewed annually; each Vanguard fund is individually liable for its borrowings, if any, under the credit facility. The amount and terms of the committed credit facility are subject to approval by the Board and renegotiation with the lender syndicate on an annual basis.

Securities Market Indexes

Listed below is a broad-based securities market index as referenced in the Fund's Average Annual Total Returns table:

FTSE Global All Cap ex US Index. An index consisting of large-, mid-, and small-cap stocks globally, excluding the U.S. The index is derived from the FTSE Global Equity Index Series (GEIS), which covers approximately 98% of the world's investable market capitalization.

Vanguard Fund	Inception Date	Newspaper Abbreviation	Vanguard Fund Number	CUSIP Number
Vanguard Total International Stock Index Fund				
Admiral Shares	11/29/2010	TotIntlAdmIdx	569	921909818

Inception Date means the date on which the assets of a fund (or one of its share classes) are first invested in accordance with the fund's investment objective. For funds with a subscription period, the inception date is the day after that period ends. Investment performance is generally measured from the inception date.
